VAT number:						
Project Type and Reference:						
Instructions for simple delivery						
- The samples will be delivered in solid format and, at least must contain 2-3 mg.						
- Since the analyzes will be carried out in Chloroform* , the samples must be soluble in this solvent.						
- After dissolution, the samples will be filtered before being injected into the GPC.						
* For analysis in THF, consult with the Facility staff.						
Sample data						
Nº	Sample Name	Polymer Type	Weight	Expected Size (if possible)	Other components present in the sample (additives, etc)
